SUMMARY

Passionate software developer with 2 years of hands-on experience in creating seamless and functional user interfaces. Proficient in switching between programming languages and frameworks as needed, with a strong ability to work efficiently both independently and collaboratively.

SKILLS

Javascript, React, Typescript, HTML, Css, Bootstrap, Mui, Node.js

EXPERIENCE

Junior Engineer

Feb '23 — Present

HEPL-CAVINKARE

Cuddalore, India

- Contributed to front-end development at Hema's Enterprises Pvt Ltd (HEPL), part of the CavinKare Group, by building custom interfaces, improving user experience, and streamlining workflows for health and hygiene product operations.

PROJECTS

Meeting Agenda [Link](#)

- Built a meeting agenda with features for creating, organizing, and scheduling meetings and agendas using React, TypeScript, and APIs, ensuring seamless collaboration and user-friendly design.
- Tools Used: React, HTML, css, Typescript, AntD

Moon Bakes [Link](#)

- Developed a bakery management system for tracking orders, inventory, and sales, ensuring smooth operations with a user-friendly interface.
- Tools Used: React, Mui, Tailwind, Typescript

PMO [Link](#)

- Implemented a comprehensive project management tool with Kanban board functionality to oversee tasks, track progress, and manage resources. The tool enhanced efficiency by providing a visual workflow for task prioritization, enabling real-time collaboration and seamless project tracking.
- Tools Used: React, HTML, css, Bootstrap

SOP [Link](#)

- Developed a tool for creating and managing purchase order tickets, incorporating a step-by-step approval process to ensure streamlined SOP compliance and efficient workflow management.

Alert Extension

- Developed a browser extension using JavaScript and JSON to provide customizable alert notifications, enhancing user engagement and productivity through timely reminders and event-driven alerts.
- Tools Used: HTML, css, JS, Bootstrap, Json and JQuery

Excel Extension

- Developed a browser extension that allows users to easily export HTML table data into Excel format with a single click. The extension simplifies data extraction and enhances workflow efficiency by converting table information into a structured Excel sheet for easy analysis and reporting.
- Tools Used: JS, Json and JQuery

AI Chat Bot [Link](#)

- Developed an AI-powered chatbot using machine learning models to automate routine tasks, enhance internal communication, and boost organizational productivity. Integrated NLP for natural language understanding, enabling efficient query handling and task automation.
- Tools Used: JS, Nodejs, Html and Css

EDUCATION

BSC Computer Science in , St.Joseph's College of Arts & Science (GPA: 6.3)

Jun '18 — May '21
cuddalore, India
